Nemko Direct for Telecom – Key Info Guide

You need to have awareness of the regulations for each country you wish to access. Some countries have specific technical requirements and restrictions relating to product testing, certification, and inspection requirements. In addition to original certifications or authorizations for a product, further testing and/or certification could be required if changes are being made to the product or new or amended regulations or standards are introduced for the country. The complex regulatory framework in some countries is constantly being updated and expanded.

The key info guide is designed as a quick reference. For more detailed information or for information concerning countries not listed please send an email with request to nd4t@nemko.com.

If you have a market access request for a country that is not in this key info, please [click here](#).

We currently have experience accessing more than 150 countries. The most common are listed below.

- 
- Abu Dhabi
 - Ajman
 - Albania
 - Argentina
 - Australia
 - Austria
 - Belarus
 - Belgium
 - Bosnia
 - Brazil
 - Brunei
 - Bulgaria
 - Canada
 - Chile

 - Turkey
 - Ukraine
 - Umm Al Quwain
 - United Kingdom
 - United States
 - Uruguay
 - Venezuela

How Nemko Direct for Telecom Works:

Market access service

The process of obtaining the necessary approvals to deliver wireless products to the world market is complex. The Nemko Direct for Telecom service will be your partner through the process of obtaining certificates and approvals. Nemko Direct for Telecom can assist you in accessing over 150 countries.

Mandatory certification

Most countries still have mandatory certification requirements for telecom and radio appliances. This means products must be approved in the respective country before being imported and sold. Nemko has relationships with approval bodies and authorities involved to avoid retest where possible. Because of the expertise and experience of Nemko you will save time and cost.

Issuing of declarations that no certificate is needed

Even if a product does not need certificates, this may not be understood by customs inspectors. It might also be necessary to show partners and customers in the market or country you are seeking to sell that a specific product does not require a certificate. To avoid these problems we can write a declaration to demonstrate that your product does not require certification.

Testing worldwide

Nemko has more than 80 years experience in testing of electrical equipment, materials, and components, and offers a wide range of testing and related services in the European, North American and Far Eastern laboratories. Testing is according to relevant international and national standards for electrical safety, EMC, telecommunication and environmental parameters. Nemko offers testing with a high level of quality as well as “one-stop-shopping”, short lead times, competitive prices and use of the most modern technology and information systems available.

Nemko Direct for Telecom offers faster market access to different countries through:

- ✓ Acceptance of valid test reports, which minimizes time, cost and retesting
- ✓ Complete project management including handling applications and communications, collecting necessary documentation and follow-up
- ✓ First hand knowledge and understanding about regulatory requirements and processes
- ✓ Dedicated professionals who stay current with the requirements for worldwide market access
- ✓ A high level of technical competence

Tom Tidwell
Director, Nemko Direct
for Telecom

“The Nemko Direct for Telecom Team would like to partner with you on your next International Market Access project. We are sure that you will find our experience and expertise to be the key to accessing global markets”

Nemko

Companies around the world trust Nemko to assess their products, systems, installations and personnel for conformity with relevant standards and regulations.

Since 1933, we have ensured that our customers comply with requirements anywhere in the world. Our services include pre-compliance, product testing, product certification, international approval, cyber assurance, field evaluation and management system certification. Through our offices, laboratories and extensive partner network in Asia, North America, Europe, the Middle East and Africa we are able to serve our customers in a reliable, efficient and open manner. We provide local presence coupled with global knowledge.

Our services

Stay ahead of the game. Lower your costs. Work with one of the first and best in class when it comes to market access. Our people, laboratories and facilities provide a complete range of world class services. As your technology partner, we can assist you with timely and cost-effective market access to more than 150 countries. With Nemko, you can integrate your approval services with testing and certification services in a one-stop-shop solution. We make processes run faster and smoother, reducing your time to market.

Pre-compliance

Expert assistance in every stage of the product development process, saving your company time and money

Product testing

Make sure that performance, risk and safety are taken care of by our internationally accredited organisation of engineers and testing laboratories

Product certification

As your certification partner, we provide certification marks that cover numerous multinational and national certification schemes

International approval

Get worldwide market access for your products through Nemko Direct

Cyber assurance

Our cyber security team helps you understand your cyber risk levels so you can efficiently and effectively protect your assets

Field evaluation

When timing is essential, you can rely on Nemko Field Services for a fast and economical alternative to traditional product safety certification

Management system certification

Our auditors have decades of experience in management system certification

Nemko Direct for Telecom (ND4T)

Nemko Direct for Telecom (ND4T) is our worldwide market access program for your wireless telecom products. Nemko bases this program on a network of relationships with regulatory authorities throughout the world. Thanks to our network, which includes countries located in America, Far East, Middle East, Africa, Asia, Europe and Oceania, we are able to provide a complete and fast market access service.
